VERBAL DESCRIPTION:

Fragment of a hollow figurine which includes a portion of a flanged headress (the right side) and the right earpool. The headress flange is plain, undecorated and wraps around the back of the figurine - the raised band continues for it on onto the back before it meets the smooth backing of the head. The earpool is .99cm in diameter, inner circle is .3cm. There is a fine cone, no fine clouding or paint. Spool may have been applied. Break between it and body is pronounced, but overall the figurine appears to have been mold-made.
